Policy

The Yearbook of the University of Insurance and Finance is an open access, peer-reviewed academic journal published by the University of Insurance and Finance. All published articles are freely available online without subscription or access fees.

Readers may read, download, copy, distribute, print, search and link to the full texts of published articles, provided that the original authors and the source of publication are appropriately acknowledged and such use complies with the applicable licence.

Access Policy and Content Licensing

All published articles on the Yearbook of the University of Insurance and Finance site are licensed under the Creative Commons Attribution-NonCommercial 4.0 International License (CC BY-NC 4.0). The applicable Creative Commons licence permits the use, sharing and, where permitted by the licence, adaptation of published material, provided that appropriate credit is given to the original authors and the source. The full licence terms are available through the Creative Commons website.

Copyright

By submitting a manuscript, authors grant the Yearbook of the University of Insurance and Finance the right to publish, reproduce, distribute and make the article publicly available in electronic form and to identify the article as part of the journal's published content.

The publication or parts of it may not be published in other editions without the written permission of the Editorial Board.

Publication of an article in the journal does not prevent authors from making permitted use of their own work in accordance with the applicable Creative Commons license and any applicable institutional or funder requirements.

Exceptions to copyright policy

Where an article is co-published with another publisher or is subject to specific funding, institutional or contractual requirements, different copyright or licensing arrangements may apply. Any such arrangements must be agreed with the journal before publication.

Submissions

The journal accepts submissions from researchers and scholars from all institutions and countries. Authors do not need to have an affiliation with the University of Insurance and Finance in order to submit or publish a manuscript.

Submission of a manuscript constitutes confirmation that:

- the manuscript is the authors' original work;
- it has not been published previously, except where the journal's policies expressly permit otherwise;
- it is not currently under consideration for publication elsewhere;
- it will not be submitted to another journal while it is under consideration by the Yearbook of the University of Insurance and Finance;
- all authors have approved the submitted version of the manuscript and agree to its submission;

- the manuscript complies with the journal's authorship, research integrity and ethical requirements.

The journal reserves the right to return manuscripts that do not comply with its submission requirements for technical revision before editorial consideration.

Fees

There are no submission fees, article processing charges (APCs) or publication fees for authors. The absence of publication charges does not affect the editorial or peer review process, and editorial decisions are made independently of an author's ability or willingness to pay publication-related fees.

Publication ethics

The journal is committed to maintaining high standards of publication ethics and research integrity. The editorial team follows the principles and guidance of the Committee on Publication Ethics (COPE) and is dedicated to following the COPE Principles of Transparency and Best Practice in Scholarly Publishing, the COPE Code of Conduct for Journal Editors and applies the journal's Publication Ethics and Malpractice Statement. Authors, editors and reviewers are expected to comply with the ethical standards and responsibilities described in the relevant journal policies.

Peer review policy

Research manuscripts submitted to the journal are subject to editorial assessment and peer review in accordance with the journal's Peer Review Policy. The journal normally uses a double-blind peer review procedure. Further details concerning the review process, reviewer selection, confidentiality, timelines and editorial decisions are provided in the Peer Review Policy.

Funding

Authors must disclose all sources of financial support received for the research, authorship or publication of the manuscript. Funding information should include, where applicable, the name of the funding institution, programme or project and the relevant grant or project number. Authors must include a Funding Statement in their manuscript in accordance with the journal's Article Template.

Conflict of interest

Authors, reviewers and members of the editorial team must disclose any financial, professional, personal or other interests that could reasonably be perceived as influencing the research, review or editorial decision. Further requirements and procedures are set out in the journal's Conflict of Interest Policy.

Plagiarism statement

All submitted manuscripts may be subject to checks for plagiarism, duplicate publication, inappropriate text recycling and other forms of academic misconduct. The journal may use appropriate similarity-detection software as part of its editorial and publication procedures.

A manuscript identified as presenting substantial concerns regarding originality or publication ethics may be rejected or referred for further investigation in accordance with the journal's Publication Ethics and Malpractice Statement.

Use of Generative AI and AI-Assisted Technologies

Authors must disclose any use of generative AI and AI-assisted technologies in the preparation of a manuscript, in accordance with the journal's requirements. Generative AI and AI-assisted technologies must not be listed as authors or co-authors of a manuscript. Authors remain fully responsible for the accuracy, originality, integrity and ethical compliance of the submitted and published work.

Further requirements concerning the disclosure and use of such technologies are provided in the Article Template and the journal's relevant editorial policies.

Data Availability

Authors are expected to provide appropriate information about the availability of the data used or generated in their research. Where possible, research data should be made available through an appropriate public database, repository or other accessible source. Where data cannot be made publicly available because of confidentiality, privacy, legal, ethical or other legitimate restrictions, authors should clearly state the applicable restrictions and, where appropriate, explain how the data may be accessed. Authors must include a Data Availability Statement in their manuscript in accordance with the journal's Article Template.

Corrections, retractions and expressions of concern

The journal may publish corrections, retractions, expressions of concern or other editorial notices when necessary to maintain the accuracy and integrity of the scholarly record. Such actions may be taken following the discovery of significant errors, research misconduct, publication malpractice or other circumstances that materially affect the reliability or integrity of a published article. The journal's procedures for handling such cases are described in its Publication Ethics and Malpractice Statement.

Complaints and Appeals

Authors may submit complaints or appeals concerning editorial or peer review decisions to the Editor-in-Chief. Complaints and appeals will be considered fairly, confidentially and in accordance with the relevant journal policies. The submission of an appeal does not guarantee a change in the original editorial decision.

Editorial Independence

Editorial decisions are based on the scholarly quality, relevance, originality and ethical compliance of submitted manuscripts. Editorial decisions are not based on the author's nationality, institutional affiliation, gender, religion, political views or other characteristics unrelated to the scholarly assessment of the manuscript.
